Oscar Heyman

Platinum 17.10-carat cat's-eye chrysoberyl ring with diamond frame (2.22 TCW), \$300,000

RADA SAHNEY:

Like a classic cocktail, this cocktail ring won't go out of style. Hailing art deco vibes, the color combination is unique and this ring would be perfect for so many occasions.

KATERINA PEREZ:

Rare colored gemstones have been quickly raising to popularity for the last few years, making this ring a perfect purchase for any jewelry lover or collector.

DEBBIE KLEIN:

This ring is a wonderful study of contrasts. The roundness of the cabochon chrysoberyl emphasizes the angular deco setting of the side baguettes, while its warmth plays off of the iciness of the platinum and emphasizes the chatoyancy of the cat's eye. Its elegant setting highlights this less traditional but unique stone.

Platinum Born
